D	UNICERT BLUE 05601-J	BLUE 1	Sensient	0.0080
	UNICERT YELLOW 08005-J	YELLOW 5	Sensient	0.0400
	UNICERT RED 07004 J	RED 4	Sensient	0.0075
E	STARDESIGN CARE	HYDROXYPROPYL STARCH PHOSPHATE	Cargill	9.0000
F	MAISITA 9040	ZEA MAYS CORN STARCH	Agrana	49.1945
G	SILICA BEADS SB-700	SILICA	Miyoshi	6.0000
				100.0000

Operating instructions

- Prepare A and heat A to 70°C.
- Prepare B, add to A and mix.
- Cool and add C to A+B.
- Mix ingredients of D to obtain a homogeneous color and add to E,F and G, then mix in a blender 3 times 1 min.
- In an inox vessel, add all the ingredients and mix manually with gloves like a shortbread pastry.
- Put all the ingredients in the blender and mix 4 times 30 sec . Remove from the blender between each step and mix very well.

Color Trans-foaming Mask

2526-1.11

+ Do it yourself

+ Transforming texture

+ Soft foamy cream

Description

This face mask will make you see all the colors! Its color and texture will transform upon contact with water.

Add water to this pale pink powder and it will turn into a tangy green foamy cream (proportion: 1/1). Leave on the skin for a few minutes then rinse.

Specifications

+ Aspect:
Light pink powder

+ >98% natural origin (ISO 16128)

+ 97% biodegradable (OECD 301F)

Ingredients

- **Emulium® Kappa MB** is used to create a soft emulsion once the water is added to the powder.
- **Labrafac™ CC MB** is an emollient that brings comfort despite the high percentage of powder.
- The combination of Maisita 9040 and Silica thicken the foamy cream obtained after adding water to the powder.
- The StarDesign Care is an aqueous gelling agent that swell and amplify the foamy aspect of the final texture.
- The addition of water-soluble dyes enables the creation of a colorful texture after adding water. Here, the red dye is slightly more water-soluble than the other two, so in contact with the air humidity it brings a pale pink color to the powder. The other two dyes are revealed on contact with water and add a green color to the resulting texture.
