+ Modeling clay

+ Soft & funny texture

+ Anti-aging properties

Description

It is an innovative formula that looks like modeling clay and that can be used as a patch on fine lines and wrinkles.

Use a pea-sized ball and spread it on the desired area after wetting. Leave it for 10-15 min, remove the patch and gently massage the area to let the product penetrate and firm the skin.

Ingredients

- **Emulium® Mellifera MB** creates a homogeneous emulsion with a high percentage of powder.
- The elastic texture is obtained by the combination of a high level of glycerin and two gelling agents: Jaguar HP-105 and Actigum CS 11 QD.
- Magnesium stearate is a fatty powder and Maisita 9040 is a softer powder. The mix of these powders creates a compact texture that does not stick to the fingers.
- **Labrafac™ CC MB** is an emollient that brings a soft touch, not too dry.
- **Lipocire™ A SG** is a consistency agent that brings body to the final emulsion without fatty effect.
- **Gatuline® In-Tense MB** is a lipophilic active ingredient with immediate results. It helps to firm the skin and enhance its density.
